Summary

Data Analyst with a BS in Data Analytics from Government College University Faisalabad (GCUF). Experienced in cleaning, exploring and visualizing data using Python, SQL, Power BI, Tableau and Excel to support clear business decisions. Seeking a remote Data Analyst role.

Skills

Languages: Python, SQL, R

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Streamlit

BI & Visualization: Power BI, Tableau, Excel, R Shiny

Other: MySQL, SPSS, ArcGIS

Projects

Retail Sales Analysis & Visualization

Python, Pandas, Matplotlib, Seaborn

- Cleaned and analyzed 1,800+ retail transaction records across categories and regions.
- Engineered time-based features (month, quarter, day of week) to uncover seasonal sales trends.
- Built visualizations to compare category and regional sales performance for business reporting.

Customer Shopping Sales Dashboard

Tableau

- Built an interactive dashboard analyzing \$2.7M in sales across 1,014 invoices and 3,075 units.
- Surfaced top-performing mall and category, and a 58% female customer contribution, to guide marketing focus.

HR Analytics Dashboard

Tableau

- Designed a workforce dashboard covering 1,470 employees with a 16.12% attrition rate.
- Broke down attrition by department, job role, age group and job satisfaction to support retention planning.

Loan Risk Analysis

Python, Pandas, Seaborn

- Identified and corrected data quality issues, including a negative loan amount, before analysis.
- Engineered a Debt-to-Income (DTI) ratio and risk category, then tested them against default rates.
- Found default rate was similar across risk categories, showing credit score alone was not a reliable predictor.

DataMate AI — Final Year Project (Team Project)

Python, Streamlit, Scikit-learn

- Co-built a no-code data analytics platform: upload, clean, explore, visualize and run AutoML on any dataset.
- Built and tested the platform against 10 public datasets under faculty supervision at GCUF.

QEC Students Portal

Python, Streamlit, PostgreSQL

- Built a student portal web application to streamline access to student records for a students' council.
- Implemented the interface and data layer using Streamlit and a PostgreSQL database.

Education

BS Data Analytics — Government College University Faisalabad (GCUF) | 2022–2026

Certifications

Data Analytics and Business Intelligence — DigiSkills.pk | 2026

Issued under: Ministry of IT & Telecom / Ignite / Virtual University
